Professional Summary

Backend Software Engineer with 1+ year of professional experience developing Java-based backend services using Java 17, Spring Boot, Spring WebFlux, and Project Reactor. Experienced in REST API development, reactive microservices, event-driven processing with Apache Kafka, and database integration using Azure Cosmos DB, MySQL, and Elasticsearch. Hands-on experience with Spring Security, JWT, Docker, automated testing, Azure, and observability. Additional experience integrating LLMs, AI agents, and Model Context Protocol (MCP) into backend workflows.

Professional Experience

MavenThink Hyderabad, India
Software Engineer – Backend Sep 2025 – Present

- Developed backend services for an enterprise Agentic AI platform using Java 17, Spring Boot, Spring WebFlux, and Project Reactor.
- Built and maintained reactive microservices supporting agents, workflow execution, integrations, and governance.
- Implemented REST APIs and workflow orchestration using Conductor OSS, including branching, validations, approval gates, retries, and execution-state management.
- Integrated Apache Kafka for asynchronous, event-driven processing between backend components.
- Implemented authentication and authorization using Spring Security, OAuth 2.0, JWT, and role-based access control.
- Integrated Azure Cosmos DB, Redis, and Elasticsearch for application data, caching, and audit search.
- Developed MCP integrations and tool-calling APIs to connect AI agents with external systems and internal services.
- Added distributed tracing, metrics, and logging using OpenTelemetry; wrote automated tests using JUnit 5, Mockito, and Reactor StepVerifier.

Technical Skills

Programming: Java 17, Core Java, SQL, Python
Backend: Spring Boot, Spring WebFlux, Project Reactor, REST APIs, Microservices
Java Concepts: OOP, Collections, Exception Handling, Multithreading
Messaging and Caching: Apache Kafka, Redis
Databases and Search: MySQL, Azure Cosmos DB, Elasticsearch, MongoDB
Security: Spring Security, OAuth 2.0, JWT, RBAC
Cloud and DevOps: Microsoft Azure, Azure Blob Storage, Docker, CI/CD, Git, Maven
Testing and Observability: JUnit 5, Mockito, Reactor StepVerifier, OpenTelemetry
AI Integration: MCP, LLM Integration, AI Agents, Agentic Workflows, Spring AI

Projects

Real-Time Video Chat Jan 2024 – Feb 2024

- Developed a WebRTC-based video calling application with screen sharing and media controls.
- Implemented Socket.IO signaling and peer-to-peer media communication using HTML, CSS, JavaScript, and Firebase.

Education

B.Tech in Information Technology May 2025
Sri Venkateswara College of Engineering and Technology, Andhra Pradesh, India 85.2%

Intermediate (M.P.C.) May 2021
Vignan Junior College, Guntur, Andhra Pradesh 90%

Achievements and Certifications

- Star Performer Award – Hackathon, August 2022.
- Java Professional – Infosys.
- Machine Learning with TensorFlow – Google Developers / SmartBridge.
- Python – InternPe.
- UI/UX Design – L&T.
